

Galapagos Natural Life

Tourist Superior Class - Yachts Galapagos

ARCHIPEL II ECO - CATAMARAN

ITINERARY DAY BY DAY

Itinerary 'A4' 4 days / 3 Nights

DAY 1 - MONDAY

In the morning: Arrival at San Cristobal Airport

A guide will meet you, help you collect your luggage, and escort you on a short bus ride to the harbour.

In the afternoon: Lobos Islet

The Lobos Islets beach harbours a colony of Galapagos sea lions. As in other colonies in the archipelago, you can approach nurturing females within a few metres. In the breeding season this colony is also visited by territorial males, defending and mating the harem on their part of the beach. This low islet is home to more than just Galapagos sea lions. Two other emblematic species breed here: male blue-footed boobies and great frigate birds who try to impress the females (and tourists) with clumsy dances, heaving their striking blue feet or blowing up their balloon-sized scarlet pouches. During the breeding season, the uffy and hungry chicks cry for food, and when their wings get strong enough, they will learn to fly.

DAY 2 - TUESDAY

In the morning: South Plaza

South Plaza is located to the east of Santa Cruz Island, and forms part of a pair of islands known as "Islas Plazas". Despite its small size, some of the most interesting and outstanding species of the Galapagos are found here. The Plazas land iguanas are smaller than their relatives on other islands. Throughout the island there are several hybrid iguanas, a result of crossing a marine iguana with a land iguana. They are unique and can be recognised at first glance by their black/grey color, with a land iguana's crest, but face and tail of the marine iguana. The big population of iguanas is due to the presence of tuna, their favourite food. Swallow tailed gulls nesting in the rugged cliffs are seen along with other seabirds as: audubon shearwaters, red-billed tropicbirds, frigate birds and brown pelicans.

In the afternoon: Santa Fe

Located in the southeastern part of the Galapagos, this island was formed from an uplift rather than being of volcanic origin, which is why it is mostly flat. There are some theories which claim that this could be the oldest island in the Archipelago. Santa Fe is home to a number of endemic species like the Galapagos Hawk, Galapagos snake, Galapagos mockingbird, rice rats and one of the two species of land iguanas of the islands. After disembarking into the beautiful and clear waters you will be in contact with one of the many sea lion colonies. Along the trail many salt bushes can be seen as well as the giant prickly pear cactus - gigantism is a characteristic of oceanic islands. There are many possibilities to snorkel with playful sea lions and tropical fish.

DAY 3 - WEDNESDAY

In the morning: Chinese Hat

Chinese Hat is a 52m/170ft high volcanic cone, forming another islet right off the rocky coast of Santiago, where a small colony of Galapagos penguins have settled. Approaching Chinese Hat from the north, you will understand the meaning of the name. This is an excellent place to learn more about volcanoes, lava bombs and lava tunnels. You will arrive just in time to witness how this barren islet is colonised by pioneer species that have begun to sprout! Beautiful beaches of white coral sand and holes in the eroding lava fields are filled up with lava sand, which enables rooting. Galapagos sea lions and countless marine iguanas contribute to fertilisation, and altogether create many favourable options for newcomers, such as saltbush and the sesuvium carpet.

In the afternoon: Dragon Hill

The visitor site at Dragon Hill has been open to visitors since 1993. This site is located in northwestern Santa Cruz Island and consists of a trail that leads to a hyper-saline lagoon behind the beach, frequently visited by aminos, pintail ducks and other species of birds. This site has been re-populated with land iguanas from Seymour, Isabela and Santa Cruz island. There is a short walk to the hill, which offers a beautiful view of the bay.

DAY 4 - THURSDAY

In the morning: Charles Darwin Station

Although the great majority of Galapagos visitors come here to observe and appreciate natural wonders, it is also interesting to learn about how the protection and conservation of the islands are carried out. The main attractions are the National Park information centre, the Van Staelen Exhibition Hall, the Breeding and Rearing Centre for young tortoises, and adult Galapagos tortoises in captivity.

Transfer out to Baltra Airport (GPS) Assisted by the naturalist guide and some crew members, the dinghy will bring you and your luggage to Baltra Airport, where we will take the shuttle back to the airport.

Rate includes:

- All meals (breakfast - lunch - dinner) water with meals.
- Accommodation in double cabins.
- Transfers from the airport to the yacht and vice versa in Galapagos.
- Excursions in the islands with English Speaking Naturalist Guide.
- **Air ticket.**

Rate does not include:

- Galapagos National Park Entrance Fee: USD 100.00 per person.
- Migratory Control Card: USD 20.00 per person.
- Soft drinks and alcoholic beverages.
- Snorkelling equipment for rent on board.
- Tips.

Note:

- Rates per person in U.S. Dollars.
- Single occupancy supplement 80% or 100%.
- The route of the ship and the itinerary are subject to change and can vary depending on the regulations and policies of the Galapagos National Park, weather, seasonal changes, safety, etc.
