

Tourist Superior - Galapagos Yachts

Aida Maria - YACHT

ITINERARY DAY BY DAY

Itinerary D 4 days / 3 nights only 2 thursday per month

DAY 1 - THURSDAY

In the morning: Airport

Fly from the Ecuadorian mainland to the islands on an early morning 90-minute flight. As you prepare to land in Baltra, look out the window. The landscape below will seem otherworldly – you'll truly be landing in a place like no other. The Galapagos Islands are completely unique and you're about to see why. Your bilingual naturalist guide will greet you at the airport and meet you after customs.

In the afternoon: Highlands

After shopping in Puerto Ayora and lunch on the boat (guests may dine in town if they desire), you'll explore the highlands or "parte alta" of the island, which is a moisture-rich area with fertile volcanic soils. You'll learn about the vegetation and animal life of this zone, often strikingly different than that found at lower elevations and our best opportunity to find the famous giant tortoises in their natural habitat.

Darwin's Finches, Yellow Warblers, and other land birds will fly in and out of the moss-covered trees. From this high vantage point you'll be treated to beautiful views of the island. In the late afternoon you'll return to town. For those who wish to check out the nightlife, this is your chance; the boat will be docked in port most of the night.

DAY 2 - FRIDAY

In the morning: Cormorant Point / Devil's Crown

When you wake up and look out your porthole on Day 6 you will see Floreana, one of the greenest islands in the archipelago. Ask your guide to tell you about its mysterious history laden with rumors of witches, murderous baronesses, blackmail, and dubious disappearances.

Your first stop is Punta Cormorant, where you'll follow a footpath to a lagoon inhabited by flaming-pink flamingos. You will also pass by Carolina Beach, a Sea Turtle nesting area and a superb spot for watching sea birds and sea rays. Back on the yacht, you'll skirt the island's coast until you arrive at La Corona del Diablo (the Devil's Crown), a sub-marine crater that offers some of the most spectacular snorkeling in the Galapagos. This is a great spot for seeing the wide array of tropical fish, many endemic to the islands, including purple sea stars and spiky sea urchins. The crater's most thrilling undersea creatures, however, are the white-tipped sharks. As with most of the creatures in the Galapagos they are unperturbed by your presence, so you can swim in their company freely and fearlessly.

In the afternoon: Post Office Bay

After returning to the boat for lunch you'll sail on to Post Office Bay, where the islands' original post office (really only a wooden barrel) was established in 1793. The current system still functions as it did three centuries ago: Visitors drop off unstamped letters and postcards AND pick-up whatever mail they can hand deliver themselves when they return home! (Try it, it actually works!).

DAY 3 - SATURDAY

In the morning: Suarez Point

Española is one of the most magical of all the islands. It is a place where the animals reign supreme and we humans are merely guests. As your dingy brings you to shore you'll see Sea Lion pups sunbathing with Marine Iguanas and Blue Footed Boobies nesting in between, and nearby may be a Galapagos Hawk. If it is Booby mating season watch the bonded pairs do the infamous Booby dance (if it's not mating season, ask your guide to demonstrate - after all it's their job to teach you about the local fauna!). As you follow the footpath around the island, you will pass hundreds of Blue Footed Booby nesting sites including one colony of masked boobies.

There is a good chance you'll see the thief-like Frigate Bird (which has the habit of stealing other birds' food), as well as the stunning Red-Billed Tropicbird and the nocturnal Swallow-Tailed Gull. If it is the right time of the year (mid-April to December) you'll also encounter the giant Waved Albatross. Apart from a few pairs that breed on Isla de Plata, off the Ecuadorian mainland, all of the world's 12,000 Waved Albatross breed on Espanola Island. At the end of the breeding season, the entire population leaves the island and heads out to sea, where they spend years without touching land; four or five years may pass before the fledglings return to Espanola.

In the afternoon: Gardner Bay

As you make your way around the island you'll pass by El Soplador, a giant blowhole that explodes to heights reaching 25 feet. In the nearby tide pools you can often find lounging sea lions enjoying the blowhole's misty spray. Following lunch on board the yacht, you'll visit Gardner Bay, a great place for sunbathing, swimming and snorkeling. Lionfish, Flycatchers, and Galapagos Hawks will keep you company as you relax under the rays of the evening sun. Dinner on the yacht completes your day.

DAY 4 - SUNDAY

In the morning: Isla Lobos / Airport

On your 8th day of visiting the Galapagos you'll arrive early in the morning to San Cristobal, the capital of the Galapagos. The first site will be Isla Lobos, a very small islet made of volcanic rocks that gets its name from the colony of Sea Lions (Lobo de Mar in Spanish) that live there. Here you can observe the behavior and interaction of Sea Lions living in a small community.

Before taking the flight back to the mainland you will have some time to visit the town on your own for last minute shopping or people watching in the Galapagos. Transfer to airport.

Rate includes:

- All meals (breakfast - lunch - dinner) water with meals.
- Accommodation in double cabins.
- Transfers from the airport to the yacht and vice versa in Galapagos.
- Excursions in the islands with English Speaking Naturalist Guide.
- **Air ticket.**

Rate does not include:

- Galapagos National Park Entrance Fee: USD 100.00 per person.
- Migratory Control Card: USD 20.00 per person.
- Soft drinks and alcoholic beverages.
- Snorkelling equipment for rent on board and wetsuit.
- Tips.

Note:

- Rates per person in U.S. Dollars.
- Single occupancy supplement 80% or 100%.
- The route of the ship and the itinerary are subject to change and can vary depending on the regulations and policies of the Galapagos National Park, weather, seasonal changes, safety, etc.
