

ITINERARY 5 DAYS A

From Sunday to Sunday

Day 1 – Santa Cruz Island

This morning you will be transferred to the airport for your flight to the Galapagos Islands. Please note the pick-up time will usually be as early as 4am as the airport is a one-hour drive and you must allow for delays and check-in times. (Your tour leader will confirm this time with you at the pre-departure meeting on Day 1. A US\$20 per person transit card is payable on departure at Quito Airport and a US\$100 per person national park entry fee is payable on arrival on the islands. Please have cash on hand for these transactions as using credit cards can be time consuming.

You will be met in the arrival hall of the airport by a National Park Guide, and transferred to the catamaran 'M.Y Grand Queen Beatriz'. Lunch will be served on the boat. Your first stop in the afternoon is Santa Cruz, the second largest island in the Galapagos. The small town of Puerto Ayora is the economic center of the archipelago, and home to the Charles Darwin Research Station. As well as undertaking vital conservation work, the station also makes for interesting exploration and offers the best opportunities for close encounters with giant tortoises. You will also observe baby tortoises and land iguanas.

Day 2 – Santa Fe Island & South Plazas

Santa Fe is home to more sea lions, and these ones are very eager for swimming partners! It's a lovely place to take a dip, and the landscape on the inland trails is also beautiful, with cacti forests home to a unique sub-species of land iguanas. Hiking towards the cliffs on Santa Fe will lead you to a forest of prickly pear cactus.

A member of the cactus family, their name comes from the pear shaped fruit the plant produces. Santa Fe is home to endemic land iguanas. Once back at the beach you will have free time to snorkel back in the lagoon. Playful sea lions pups and florescent fish make for fascinating company. A small island, Plaza Sur is nonetheless a place of great beauty, where you will get close to sea lions and onto trails past one of the Galapagos' largest land iguana populations, resting amid cacti and volcanic landscapes colored bright red and green by sesuvium. The island's rugged southern cliffs are an excellent place to spot tropicbirds and swallow-tailed gulls, as well as 'the gentlemen's club', a gathering of male sea lions either too young or too old to be beach masters!

Day 3 – Española Island

Today you will cruise to the island of Española - the southernmost island of the Galapagos and one of the most spectacular. Because of its remote location, this island has a large population of endemic fauna. It is the breeding site for nearly all of the world's 12,000 pairs of waved albatrosses and also home to colonies of blue-footed and masked boobies. Trails from the golden beaches, where sea lions bathe and marine iguanas make their way towards the water, will lead you right through the middle of booby colonies, and Galapagos doves and mockingbirds are also often seen. You will also visit the beautiful white sandy beaches at Bahia Gardner, which are great places for swimming and relaxing. The rocks off the coast provide excellent snorkeling opportunities, with reef sharks, turtles and many species of tropical fish, including surgeon and angelfish, often seen. The small white-tipped reef sharks are also often spotted resting under the rocks.

You will also pay a visit to Punta Suarez, one of the most attractive locations in the Galapagos and home to large and varied wildlife population - a walk along its trails will take you to a cliff top viewpoint, where you'll gain a magical panorama. Boobies line the rocky shoreline beneath you, while frigate birds may be seen overhead; nearby enormous male sea lions can be seen lounging and albatross use the cliffs as their 'runway', helping become airborne by the southeast winds that blow across this part of the island. If you're lucky you'll see the elaborate courtship rituals performed by albatrosses before the female chooses her lifelong mate!

Day 4 – Pitt Point and Kicker Rock / Lobos Island

This morning you will visit Punta Pitt on the eastern end of Isla San Cristobal. Walk to the top of the volcanic hill for expansive views of the sparsely vegetated area. A variety of sea birds nest here, including blue-footed boobies and frigates.

Close by you will pass through Leon Dormido (Kicker Rock), which is a magnificent rock in the middle of the sea, the shape resembles a sleeping lion. The rock rises 150 meters above the surface and is divided into two parts by a narrow channel. You will also visit Isla Lobos, a tiny island almost touching Isla San Cristobal. This is the perfect time to witness the always friendly sea lions as they play in the calm shallow waters here.

Day 5 – San Cristobal

As flights to the mainland from Galapagos depart mid-morning, it is an early start for our last morning on the islands. Depending on the time of our flight, our time spent on this final excursion could be limited. Visit the Interpretation Centre in the morning. The center brings the history and geography of the archipelago to life, from its volcanic origins to the present day. The human history exhibit offers an insight into the discovery and colonization of the Galapagos, and the reality of the problems the islands face today is also explored.

This is a great way to complete your time in the Galapagos. This will be your final excursion before you head to the airport in San Cristobal for your flight back to Quito. As you will be leaving the boat this morning, please remember that if you have enjoyed the services provided by your guide and crew, a tip would be very much appreciated by them. As a guideline we recommend each passenger consider US\$15 per day for the crew and US\$10 per day for your guide. You can leave tips in envelopes that are placed in your cabin on this last day of your journey.
