

Luxury Class - Yacht Galapagos

INTEGRITY YACHT

ITINERARIES

## Itinerary "Eastern Route"

8 Days – 7 Nights

### Day 1: Saturday

**In the morning:** Baltra Airport Arrival

Morning flight from Quito or Guayaquil to Baltra, Galapagos Islands. You will arrive at Baltra Island in the morning. After passing through immigration and baggage claim, you will be met by a Integrity staff member and transferred to the yacht. You will be shown to your cabin where you will have some time to settle in before lunch and a welcome briefing.

**In the afternoon:** Highlands

Accessible by bus from Puerto Ayora, the highlands of Santa Cruz are a deep green which contrast beautifully with the dry, lower part of the islands. The predominant vegetation in the highlands are Scalesia trees which create a lush green forest. The lava tunnels, over half a mile

long, are underground and walking through them is a unique, surreal experience. At this place you'll have lunch.

**Afterwards:** Fausto Llerena Breeding Center

You will visit "Fausto Llerena" Tortoise Breeding Center in Puerto Ayora, where giant tortoises are bred in captivity. This is home to tortoises ranging from 3-inches (new hatchlings) to 4-foot long adults. Subspecies of the giant tortoises interact with one another, and many of the older tortoises are accustomed to humans stretching out their heads for a photo opportunity. The babies are kept until they are about four years-old and strong enough to survive on their own.

## **Day 2: Sunday**

**In the morning:** Gardner Bay, Gardner Islet & Osborn Islet

This excursion takes you to the spectacular Gardner Bay. After landing, you can walk across a lovely white-sand beach amongst a busy sea lion colony or dive into the water to swim with sea lion pups. You may also see curious mockingbirds on the beach.

**In the afternoon:** Suarez Point

On the trail to Suarez Point you will have the chance to spot blue-footed boobies, albatrosses, and Nazca boobies. This island is the breeding site of nearly all of the world's 12,000 pairs of waved albatrosses. You will also visit a beautiful site on the ocean front where there is a cliff that the large albatrosses use as a launching pad! You will have the chance to see the famous blowhole that spurts sea water into the air. The landscape is great for photography.

## **Day 3 : Monday**

**In the morning:** Pitt Point

Pitt Point, situated on the north-eastern tip of the San Cristobal island, hosts frigate birds, storm petrels, and all three types of booby birds: the Nazca, blue-footed and red-footed boobies. A steep trail goes up a cliff and through a ravine leading visitors to an area with an abundance of birds.

**In the afternoon:** Witch Hill

Located on the northern coast, this eroded hill and its surroundings present one of the most picturesque beaches in the Galapagos with its white powdery sand and the abundance of animals. Wildlife includes sea turtles, rays, and various types of booby birds. The clear water provides an excellent opportunity for enjoying swimming and snorkeling.

## Day 4: Tuesday

**In the morning:** Santa Fe Island

Santa Fe Island (Barrington) is home to the small picturesque bay and anchorage on the island's northeast coast. The bay has two visitor trails: one leading to a scenic viewpoint atop a cliff, and the other spanning from a small beach to a tall prickly pear cactus forest.

**In the afternoon:** South Plaza Island

This small island with steep cliffs was formed by rising lava and is now covered by Opuntia cacti. It is also home to one of the largest sea lion colonies as well as colorful yellow and red land iguanas. The most characteristic plant is the Sesuvium. During the rainy season its color is a greenish to yellowish tone and in the dry season (end of June through January) a bright red.

## Day 5: Wednesday

**In the morning:** Darwin Bay

Visit the white-sand coral beach of Darwin Bay which includes a half mile trail (0,75km) that winds through mangroves filled with land birds. Nazca boobies, red-footed boobies, and swallow-tailed gulls, which can easily be spotted here. Further down the path we'll find tidal pools where sea lions swim playfully. At the end is a spectacular view of a cliff.

**In the afternoon:** El Barranco

El Barranco, also known as Prince Phillip's Steps, is a steep, rocky path that leads up a high cliff rock face. A marvelous view can be appreciated from here. This site is also home to Palo Santo vegetation as well as red-footed boobies, short-eared owls, Galapagos storm petrels, and Galapagos doves.

## Day 6: Thursday

**In the morning:** Sullivan Bay

You will visit Sullivan Bay located on the southeast part of Santiago. This place is interesting for its geology because the area is covered by lava flows. This place has elevations in the form of small volcanoes formed by the lava flows.

**In the afternoon:** Pinnacle Rock

You will head to Bartholomew Island where the famous Pinnacle Rock is found. Bartholomew consists of an extinct volcano with a variety of red, orange, black and even green volcanic formations. We will take a trail of stairs to the summit of the volcano (about 30 or 40 minutes)

where you will enjoy one of the best views of the islands! You will also visit a small, beautiful beach surrounded by the only vegetation found on this barren island. The beach is perfect for snorkeling where you may even see and swim with Galapagos penguins.

## **Day 7: Friday**

### **In the morning:** Rabida

You will visit Rabida Island (or Jervis) which is one of the most colorful and volcanically varied islands in the archipelago as well as a great snorkeling site. We will start on Rabida's famous maroon/red sand beach, and after an easy hike, you will arrive to a stunning lookout to enjoy the amazing landscapes. The island is a birdwatcher's delight. Some species are abundant such as a few varieties of finches, Galapagos vermilion flycatchers, Galapagos hawks and brown pelicans.

### **In the afternoon:** Chinese Hat Islet

This small islet is located near the southeast coast of Santiago Island. Its name comes from the distinct shape of the islet's summit. Chinese Islet is a great location to view many geological formations such as lava tunnels and lava flows. Some of the lava flows were formed underwater and subsequently raised above sea level. The presence of coral heads on the lava flow indicates this phenomenon.

## **Day 8: Saturday**

### **In the morning:** Baltra airport departure

After breakfast, you will be transferred to the Baltra airport in time for your flight back to the mainland.

### **Rate includes:**

- Snorkelling equipment
- All meals (breakfast - lunch - dinner) water with meals.
- Accommodation in double cabins.
- Transfers from the airport to the yacht and vice versa in Galapagos.
- Excursions in the islands with English Speaking Naturalist Guide.

- **Air ticket**

**Rate does not include:**

- Galapagos National Park Entrance Fee: USD 100.00 per person
- Migratory Control Card: USD 20.00 per person
- Soft drinks and alcoholic beverages.
- Tips.

**Note:**

- Rates per person in U.S. Dollars
- Single occupancy supplement 80% or 100%
- The route of the ship and the itinerary are subject to change and can vary depending on the regulations and policies of the Galapagos National Park, weather, seasonal changes, safety, etc.
